# Organic Mosquito Control CPRI Barbados - "Are you fogging kidding me?"

October 27th . \$35 suggested donation . 9am-12noon @ Walkers Reserve, St. Andrew

Creating layered biological systems for organic mosquito control.

How to **attract mosquito predators** at different stages of their life cycle. How to create "**mosquito magnets**" by, building and growing habitat for these predators. This workshop will include **building a bat house from recycled materials**, and give information about building dragon fly habitats and using fish to **disrupt the mosquito breeding cycle** at various stages. These strategies will be discussed on a **house hold and community level** and expanded to a national level. Discussions will include water management strategies to create agricultural pockets of abundance, jobs , healthy organic food.....and helps control mosquitoes at the same time.
