

Composting 101

CPRI Barbados - Rotating and Pile composting
April 21st . \$50 . 9am - 12noon @ Walkers Reserve, St. Andrew

How to get started with your rotating composter or compost heap.

Eliminate the need to buy artificial fertilizers. **Convert your kitchen and yard waste into a valuable resource.** Participants will be introduced to the value of compost and composting principles. We will take you through the process of selecting materials that can be composted in both a **barrel composter and a compost heap.** Together we will start a barrel composter and build a compost heap. Then learn how to use your finished compost to **make a compost tea** that can be sprayed on plants or used to water them.
