

Seed Saving 101

CPRI Barbados - Become a Seed Saver

March 25th . \$70 . 1pm - 4pm @ Walkers Reserve, St. Andrew

Be a part of the SEED REVOLUTION!

The nature of your food depends on the type of seeds you grow and no, we don't want any FRANKEN-SEEDS, so GMOs these are definitely No No's.

Open-Pollinated yes and definitely Heirlooms. If you want to learn how to save the seed from your crops, kitchen garden or potted herbs to replant. We'll take you through from beginning to the end. **Growing for seed, harvesting, drying and storing, then the best part - replanting!**

Whether you plan to replant or just to save seeds to give back to your farmers there is something for everyone to learn. Harvest seeds from dry pods, wet fruit and all the storage techniques required. Of course the fun part is the **hands on session.**
